CANON EOS EOS 300D INSTRUCTION MANUAL Pdf Download.

When using a manual focus lens on an EOS body there are two exposure modes which will work correctly, Manual and Aperture Priority. In manual mode you set both the shutter speed (via the EOS body) and the Aperture (via the aperture ring on the lens) yourself.

Using Manual Focus Lenses on Canon EOS bodies

Canon did once make a good optical type adapter for using FD lenses on EOS but it only works on certain tele lenses plus it is VERY expensive .Figure on at least us\$600 2nd hand !!!Added to that it does degrade optical quality very slightly (although it helps that it only fits some of the very best professional lenses)

Using FD (and other) lenses on EOS bodies -- Canon EF and ...

I have a 300D and use old Pentax, Olympus and Nikon manual focus lenses via various adapters. I have been trying to work out how the built-in flash works with these, as I assume that information provided by the Canon EF/EF-S lens interface is usually used to calculate the correct flash exposure.

The image was shot with a Figmentum 35mm lens. Focus was easy, as the distance from the subject let me simply set the lens on infinity. But, the aperture required some manipulation, as I started off too bright, and had to close the aperture slightly. I actually shot this at ISO 100 for 30 seconds at f5.6,...

5 Advantages of Using a Fully Manual Lens

Hack Canon EOS 300D to Confirm Focus With All Lenses, Permanently.: Well, right, you can do this easily by using various chipped adapters for several lens mounts - but how about permanently modifying your camera to do the same and avoid paying extra for multiple adapters? I love my 300D but I don't own any EF/S le...

The Canon EOS 300D, manufactured by Canon, was marketed in North America as the EOS Digital Rebel, in Japan as the EOS Kiss Digital, and was also sold as the DS6041. It is a 6.3-megapixel entry-level digital single-lens reflex camera. It was initially announced on 20 August 2003 at a price point of \$899 without lens, \$999 with the "kit" lens. It is part of the Canon EOS line of cameras.

Canon EOS 300D - Wikipedia

The Opteka 500mm / 1000mm f/8 Manual Focus Lens is a classic refractor-style T-mount lens, with an aperture diaphragm in the middle of the lens body to stop down the aperture when necessary. However, it is assumed that much of the shooting with such a lens will be at its maximum f/8.0 aperture, with a tripod, monopod, or other such support.
