Chrysler 2.0 DOHC engine - Allpar

Why are 4 valves per cylinder better than 2 valves per cylinder? Is DOHC better than OHV? 4 valves per cylinder allows for more airflow than 2 valves per cylinder, as there is larger open area ...

Why Are 4 Valves Better Than 2? DOHC vs OHV

An EFI 16-valve DOHC is a four-cylinder engine with four valves per cylinder, dual overhead cam and electronic fuel injection. Most engines with these features have a displacement of 2.4 liters or less. The engine is the smallest for most European, Japanese and North American cars. Compact trucks are often equipped with such engines.
